SHAHISTA TAMKEEN

IT & Data Analytics Graduate Student| Python Automation | Enterprise Data Systems

Chicago, IL | +1 (947) 275-7946 | Email: stamk0328@365.elmhurst.edu | LinkedIn: https://www.linkedin.com/in/shahista-tamkeen/

PROFESSIONAL SUMMARY

Data-driven IT professional with experience in enterprise analytics, automation, and dashboard development using Python, SQL, Tableau, and Power BI. Successfully designed and optimized ETL and validation workflows that reduced manual effort by 35% and accelerated reporting by 50%. Adept at bridging technical and business teams to deliver actionable insights, statistical analysis, and data governance solutions. Known for combining analytical rigor with automation expertise to enhance operational efficiency and decision quality.

TECHNICAL SKILLS

Programming & Automation: Python, SQL, Java, C++, R, Data Structures and Algorithms, CNN
Data Analytics: Data Quality Validation, Master Data Management, Reference Data Modeling, ETL/Data Warehousing, Data Visualization, Statistical Analysis, Data Modeling, Exploratory Data Analysis (EDA), A/B Testing, Machine Learning
Automation & Controls: Python Automation, Workflow-Automation, Automation Testing, Control Validation
Tools & Platforms: Tableau, Power BI, AWS, Google Cloud Platform, PostgreSQL, PySpark
Web Applications: React, Django, REST APIs, JSON, Junit Testing
Cloud: Amazon Web Services(AWS – S3, EC2), Microsoft Azure, Google Cloud Platform(GCP)

PROFESSIONAL EXPERIENCE

Graduate Assistant

Elmhurst University – Computer Science & Information Systems *Feb 2024 – Present*

- Automated data validation and ETL workflows using **Python** and **SQL**, reducing manual processing time by **35%** and improving enterprise data quality and control reliability.
- Implemented **Master Data Management (MDM)** practices, QA checks, and standardized data models to resolve data inconsistencies and support governance initiatives.
- Designed scalable pipelines for multi-million-row datasets, ensuring traceability, accuracy, and analytics readiness.
- Collaborated with faculty and stakeholders to translate business requirements into technical solutions; produced technical documentation, audit records, and control validation reports.
- Developed automation prototypes and LLM-based tools using **OpenAI APIs**, while supporting IT operations, system provisioning, and application debugging (C++).

Data Analyst

Optum – Hyderabad, India *Dec 2023 – Jul 2024*

- Built and optimized ETL pipelines using **Python** and **SQL** to process over 5 million records weekly, supporting enterprise analytics and business reporting systems.
- Implemented automated **data quality** checks and **validation workflows**, reducing data inconsistencies by **40%** and improving trust in enterprise datasets.
- Performed **exploratory data analysis (EDA),** statistical analysis, and **A/B testing** to support business performance and decision-making.
- Developed **Tableau** and **Power BI dashboards** used by cross-functional business teams to monitor operational and customer-related metrics.
- Automated data preprocessing and reporting workflows, reducing dashboard refresh times by **50%** and increasing delivery speed for stakeholders.
- Partnered with business users and technical teams to clarify requirements, document data definitions, and align analytical outputs with business objectives.

ACADEMIC PROJECTS

AI for Brain Age Prediction – Project Lead

- Built an end-to-end deep learning system using CNN, **Python, TensorFlow**, and **PyTorch** to support enterprise-style analytics and predictive modeling.
- Designed scalable data pipelines and automated evaluation workflows to ensure data quality and reproducibility.

- Produced visualizations and reports to support model interpretability and stakeholder communication.

Reputation System Analysis Using NLP – Project Manager

- Developed sentiment analysis models across multilingual datasets using Python and NLP techniques.
- Created dashboards and reporting workflows enabling real-time insights for business decision support.

Pneumonia Detection – Project Assistant

- Built a 97.89% accuracy CNN model using TensorFlow, with modular pipelines suitable for internal system integration.
- Designed deployment-ready architecture aligned with enterprise data processing standards.

EDUCATION

Master of Science in Computer Science and Information Technology | CGPA: 3.9/4.0
Elmhurst University – Chicago, IL | 2024 – 2026

Bachelor of Engineering in Information Technology | CGPA: 7.5/10.0
Mahatma Gandhi Institute of Technology – Hyderabad, India | 2020 – 2024

CERTIFICATIONS

- Google Cloud Certified Professional By Google
- Java Fundamentals By Oracle
- Java Programming By Oracle
- CLA: Programming Officials In C By C++ Institute
- Career Essentials in Data Analysis by Microsoft
